

## **COVID-19 Customer Update: Pennsylvania Operations to Remain Open**

March 20<sup>th</sup>, 2020

To Our Valued Customers,

These are certainly unprecedented times in our communities and industries. As of yesterday afternoon, the governor of Pennsylvania has issued an order to all businesses not classified as life-sustaining to close indefinitely under quarantine precautions.

Allegheny Coatings' Ridgway, PA operation has filed an exemption from this classification due to our broad customer supply chain supporting medical, food processing, and military equipment. **As a result, our Pennsylvania operations will remain open for business with no disruption until further notice.**

Our sales or customer service team will be in touch with you if any of your orders will be affected as the situation develops. Also, if your business is considered high-priority for life-sustaining purposes, please let your Allegheny Coatings representative know immediately so that we may take it into proper consideration.

Thank you for your attention and support during this unique situation. Please be safe and healthy as we work through this challenging time together.

Stay well,

Christopher R. Pletcher  
Vice President, Allegheny Coatings
